

Diesel System Clean+ d60

BENEFITS

- ✓ cleans injectors efficiently
- ✓ removes carbon deposits from intake valves and combustion chamber
- ✓ increases the performance of engine
- ✓ reduces fuel consumption and lowers emissions
- ✓ extends the life of the fuel system

Usage

PRODUCT DESCRIPTION

BIZOL Diesel System Clean+ d60 is a fuel additive Made in Germany especially developed for maintaining the entire fuel system. Low or inconsistent fuel quality can cause carbon deposit build-up, inefficient ignition and combustion as well as poor power output. **BIZOL Diesel System Clean+ d60** effectively cleans the entire fuel system, particularly injectors and valve seats, and prevents from corrosion. This product meets the demands of diesel engines with Common Rail and Pump-Injection high pressure injection and also protects the DPF. It improves the ignitability of the diesel fuel by increasing the cetane number up to 6 points. The regular use of this unique fuel additive leads to lower fuel consumption, noticeably smoother engine run and increased operational reliability.

Diesel System Clean+ d60

Available Packages

Size	Art. Nr	Languages
250 ml	8881	DE / EN / FR / ES / ZN / AR
250 ml	98881	EN / GR / PL / RO / RU
1 L	2351	

Technical Data

Name	Value	Method
Appearance	slightly brown, clear	
Density at 15 °C	850 kg/m³	DIN EN ISO 12 185
Viscosity at 20 °C	2,3 mm²/s	
Flash Point	72 °C	

How to use

A 250 ml can is efficient for up to 70 litres of diesel fuel. Just pour it in the fuel tank before filling, it is self-mixing. For preventive maintenance use every 3rd tank filling. In countries with low fuel quality recommended for continuous use. A 1 l can is efficient for up to 280 litres of diesel fuel. Just pour it in the fuel tank before filling, as it is self-mixing. For preventive maintenance use every 3rd tank filling. In countries with low fuel quality recommended for continuous use.
