

# Gasoline Intake Clean+ c36

## BENEFITS

- ✓ quick and effective cleaning of the throttle without dismantling
- ✓ significantly smoother engine operation after cleaning
- ✓ improves engine performance, reduces fuel consumption and emissions

Usage

## PRODUCT DESCRIPTION

**BIZOL Gasoline Intake Clean+ c36** is a high-quality, effective and easy-to-apply cleaner for removing typical dirt and deposits from throttles and intake manifold. It can be used to clean the EGR valve on petrol engines. Ensures smooth functioning of the throttle flap, its free movement and closing. Contributes to the reduction of fuel combustion and exhaust emissions.

| 500 ml | 80016   |

## Technical Data

| Name            | Value          | Method |
|-----------------|----------------|--------|
| Appearance      | Transparent    |        |
| Scent           | Characteristic |        |
| Density at 20°C | 0,8 g/cm³      |        |
| Flash Point     | -97 °C         |        |

## Applications

Product for cleaning the throttle without removal and the EGR valve on petrol engines.

## How to use

Aerosol should be at room temperature. Do not spray on hot surfaces. Remove the tube that carries the air to the throttle for access. Shake the can well before use. Apply the product to the throttle inlet and leave for 2-3 minutes. Then start the engine and reapply. IMPORTANT: Do not spray too much to avoid fluid puddles and engine choking. If the engine runs very erratically, switch it off immediately. Avoid contact of the product with painted surfaces and plastic.
