

AC Clean+ c30

BENEFITS

- ✓ Cleans the air conditioning system
- ✓ Improves travelling comfort by providing a fresh fragrance inside the vehicle
- ✓ Provides a long-lasting fresh effect
- ✓ Once sprayed, maintains the consistency of active foam for a long time

Usage

PRODUCT DESCRIPTION

BIZOL AC Clean+ c30 allows easy, effective and permanent cleaning of the air conditioning system.

AC Clean+ c30

Available Packages

Size	Art. Nr	Languages
400 ml	80001	DE / EN / FR / ES / RU / ZH / AR
400 ml	90001	EN / GR / PL / RO / RU

Technical Data

Name	Value	Method
Basis	Surfactant solution	
Scent	Orange	
Appearance	white foam	
Density at 20°C	0,87 g/cm³	

Applications

For use directly on the evaporator of an air conditioning system, also for cleaning of the air outlet ducts

How to use

The aerosol should be at room temperature before application. The cabin filter should be located (e.g. using a filter catalogue) and removed. The evaporator should be pre-dried by running the heater at maximum temperature, setting the air outlets to the legs and allowing the air to reach maximum strength for 10 minutes. Shake the can before use. Apply the product with the supplied probe to the air-conditioning evaporator and leave for about 20 minutes. Insert the probe approximately 30 centimetres into the air conditioning air intake and inject a small amount, taking care that the foam does not drip onto the electronic components. Dry the evaporator from the fluid with the same heating and ventilation system settings as before cleaning. Fit a new cabin filter.

Follow instructions

Please follow the operating instructions of the vehicle and engine manufacturer.
