

Benefits

1. prevents wear and sticking of screwed connections
2. high thermal resistance
3. prevents corrosion

Product Description

BIZOL Copper+ L54 is a spray with a high copper content to prevent wear and sticking of screwed connections which are exposed to very high temperatures. It has a high thermal stability, prevents corrosion, is dirt repellent and weather resistant. It comes with an additional spray nozzle and an extension tube in the cap.

Available Packages

400 ml Art. 80006

Technical Data

Name	Value	Method
Solid content	31 %	
Basis	EP Grease and small copper particles	
Colour	copper like	
Scent	Characteristic	
Relative density at 20°C	0,800 g/ml	
Temperature resistant	-40-+1100 °C	

WITH

WITHOUT

Applications

Spray on brake parts, exhaust parts, battery poles, spark plugs, screwed connections, or parts exposed to high temperatures.

Usage

The aerosol should have room temperature. Best processing temperature 5 to 30°C. Before use, shake the aerosol. Apply copper grease. The specific lubrication property is achieved after evaporation of the solvent (approximately 1 minute).
