

Cooling system

BIZOL PRESS RELEASE

increased consumption / coolant leakage

05/05/2022

In the course driving, fissures can form in the car radiator and in other parts of the cooling system such as connection points. Especially when the car is hit by stones, is exposed to vibration. Of course any leak will mean a drop in the coolant level.

BIZOL Radiator Repair+ r71

A sealant for the car cooling system

- seals small fissures reliably
- seals small leakage points
